Our hang tags are made with a composite material that's stronger than the competition. We tested different material combinations until we came up with the perfect mix for the best quality.

Our composite is engineered to be:

- **Better Looking:** Looks and feels similar to a credit card - rigid, durable, and with a gloss finish.
- **Stronger:** Graphics, text, and other printed elements are protected between layers of material - they will not scratch or scuff. Composite properties also enable hang tags to stand up to extreme temperatures that can exist inside a vehicle.

- **Fade Resistant:** UV-Inhibitors are infused into the material - which makes the hang tag resist premature fading.
- **Higher-Quality:** A better product at no additional cost to you.

- **Cleaner:** Images and graphics print clean and crisp.

Additional materials are available based on your requirements. Security features and other services can also be incorporated into your design. Please contact us for more details.

Wouldn't it be great if hang tags were harder to counterfeit, and easier to identify as valid? Rydin can make that happen in a number of ways:

- Rydin Reflex Material
- Barcodes
- Holograms
- Counterfeit-Deterrent Ink
- Micro-Print
- Hot Stamping
- Reverse Numbering

See page 35 for additional information on all our security features.

CUSTOM SHAPES

Rydin makes hang tags in a variety of shapes: rectangles, ovals, circles, mascot-shaped, and more. But, what if you want an entirely unique shape for your hang tag? Thanks to our in-house die cutting capabilities, Rydin can make hang tags in virtually any size and shape you desire.

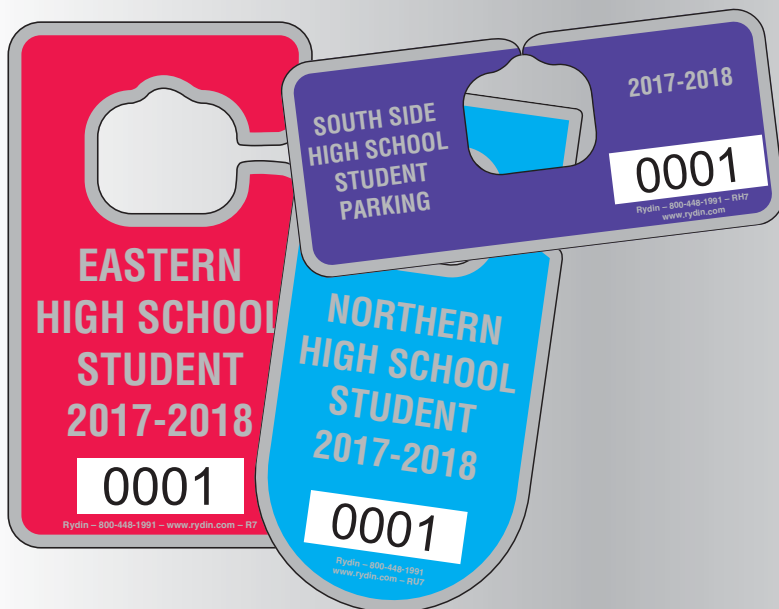

You want it...we will make it!

A barcode can be added to any decal or hang tag to increase security and identify vehicles. Scan these barcode parking permits with any portable scanner or a smart phone. Various encoding languages are available.

**Call our sales team
today to discuss your
custom hang tags!**

REFLECTIVE HANG TAGS

Rydin's innovative Reflective Hang Tags are perfect for extra security and high visibility, even at night. Security personnel can easily spot valid permits with a flashlight for a quick survey of your lot. Reflective hang tags are printed on our uniquely manufactured Rydin Reflex material to be extremely durable, yet tamper proof.

TEMPORARY HANG TAGS

[Back to Table of Contents](#)

Rydin's paper temporary hang tag is an efficient and cost effective way to identify visitors. Our standard temporary hang tag is 2.75 x 4.75, and can be purchased "as is" or customized to your company needs.

Temporary Paper Hang Tags can be printed on Astrobright Cover (assorted colors), 110# White Index, 110# Ivory Index or 100# White Gloss Cover.

SCRATCH-OFF HANG TAGS

HANG TAGS

Are you looking for an additional security feature in your temporary parking permits? Our scratch-off hang tags allow you to assign an expiration date at the time the permit is issued. If more than one date is exposed, the permit becomes invalid. Custom sizes are available and back print or instructions are optional features.

As with all our products, we can customize your scratch-off permits to suit the needs of your organization.

Contact us for pricing or special features

RFID HANG TAGS

RFID stands for Radio Frequency Identification. It is a radio technology that allows our hang tags to be identified at a distance, by incorporating a small chip & antennae (called an inlay) into the design.

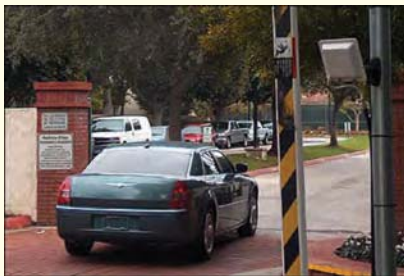

RYDIN RFID SPECIFICATIONS:

Size: Vertical Standard RFID Hang Tag (RFID-01) is 3.125\" x 5.25\".
Horizontal Standard RFID Hang Tag (RFID-02) is 4.75\" x 2.75\".

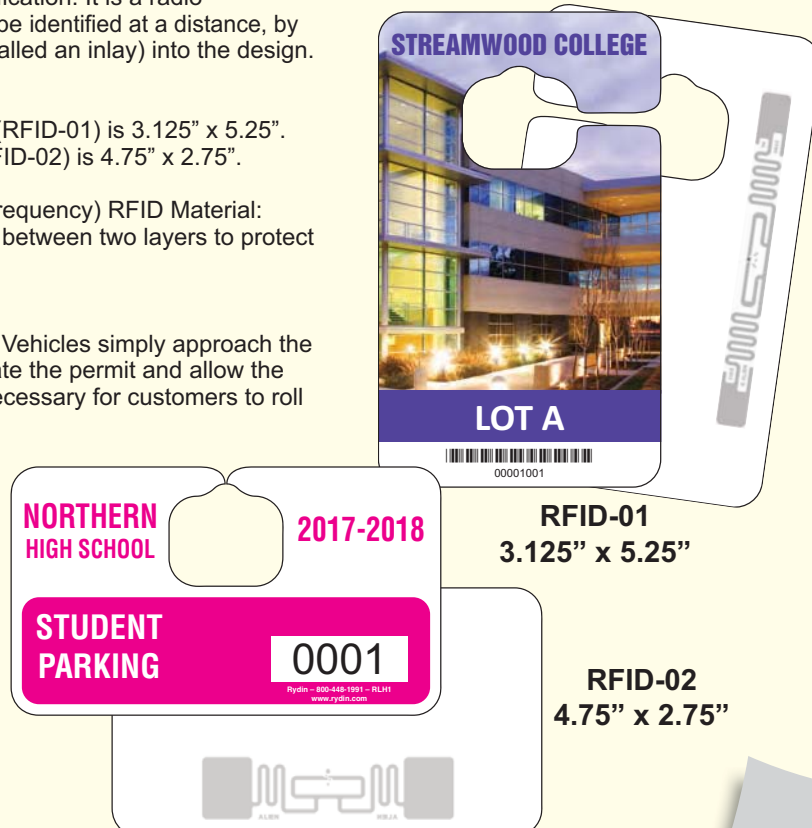

Protocol: EPC Gen 2 UHF (Ultra High Frequency) RFID Material: Rydin composite. The inlay is laminated between two layers to protect it from damage. Range: up to 25 feet.

Benefits of Rydin RFID Hang Tags

Makes Gated Access More Convenient. Vehicles simply approach the gate and the RFID reader will authenticate the permit and allow the vehicle to pass through. It's no longer necessary for customers to roll down their windows and swipe a card.

BACKPACK AND PARENT PICKUP TAGS

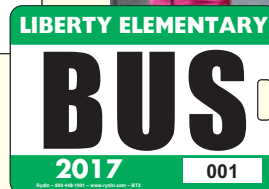

[Back to Table of Contents](#)

There is nothing more important than the safety of your children. With Rydin's line of Parent Pickup Hang Tags and corresponding Backpack Tags, you'll be able to easily identify the correct car in the pickup line outside of school.

Extremely popular among primary and elementary schools, these products allow for more organization and a more efficient drop off and pickup system. You can even upload your own logo or graphic and create a permit unique to your school's needs!

STOCK DECALS

Ship Next Business Day!

Our 3" x 3" stock decals are a quick and easy way to secure your parking lots. The decals are made from a clear polyester material. An adhesive is on the face of the decal - simply remove the protective liner and apply the decal to the inside of the windshield.

Each pack is consecutively numbered.

STOCK DECALS

\$55/BUNDLE OF 100

Want to match your organization's colors on your decal? Rydin can custom match any Pantone color. We also have a library of hundreds of school mascots and logos to add to your decal, or you can provide your own. Contact our Sales Team for additional information.

We offer two standard materials:
Inside Window Style (peel off face): printed on non-destructible clear mylar material.

Bumper Style (peel off back): printed on non-destructible white vinyl material. We offer additional materials to fit your needs. See page 34 for additional information on all our materials.

Wouldn't it be great if decals were harder to counterfeit, and easier to identify as valid? Rydin can make that happen in a number of ways:

- Rydin Reflex Material
- Barcodes
- Holograms
- Counterfeit-Deterrent Ink
- Micro-Print
- Hot Stamping
- Reverse Numbering

See page 35 for additional information on all our security features.

SPECIAL EVENT TICKETS

Make your event one to remember! Special event tickets can take any occasion and make it an amazing and well organized event. Custom tickets can add fun or elegance to special anniversary parties, school dances, theatrical performances, sporting events, concerts, conventions, reunions, fundraising events, galas, business events, parties and special gatherings of any kind.

Call our Sales Team for more information and pricing.

CREDENTIALS

[Back to Table of Contents](#)

Rydin can design and print custom credentials for your team or event! Supply your team, staff, guests, and media with a custom credential with their name, company, photo, and information on each credential. Add additional security features such as barcodes and holograms to increase security.

Call our Sales Team and impress everyone with your full-color, durable credentials.

SEASON TICKET PASSES

Season passes or ticket cards are an easy and convenient way to provide game day access to your guests. Each game day card can be customized any way you wish, including material, holograms, barcoding, and much more. We can customize your season ticket cards to any size you wish, and include your logos, graphics and schedules.

EMPLOYEE NAME BADGES

Rydin can design and customize your company's personalized name badges, IDs, and access cards. Each employee name badge can incorporate your company logo, employee information, photo, and even a barcode for additional security.

RYDIN PERMIT EXPRESS™

www.rydin.com RPE/DISTRIBUTION SERVICES

Do you dread the long lines outside your office and the endless hours of entering driver information into a spreadsheet every time the new parking permits need to be issued? Would you like to increase data collection and retrieval speeds? Increase your collections of parking fines? Let us help!

BENEFITS

Online Driver Registration

Eliminate the need for permit registration forms to be hand written. No more putting that form in a filing cabinet, or hand entering the registration information into a spreadsheet. With PermitExpress™, the driver goes online and keystrokes all of their information! The driver must agree to your specific parking rules and regulations or they will not be allowed to complete their registration. We will also work with you to insure your institution's colors and logos are used on the registration site, carrying your branding through to the permit registration process.

Online Driver Payments

PermitExpress™ has the ability to offer online payments, either by integrating with your existing credit card merchant, or creating one for you. This is not only a convenience for the driver, but can also reduce your office traffic.

Parking Citations

If you are continually issuing citations to drivers who violate your rules and regulations, the citation details can be viewed online by the driver with additional options to appeal and pay online. With PermitExpress™ you have the ability to issue citations electronically and have access to your database in real-time!

Real Time Information

Within seconds of completing the online registration, the driver receives an order confirmation email, and the order information is retrievable by you and your staff. Permit and citations payments, as well as citation appeals, can be viewed in real time by a PermitExpress™ administrator.

"When thinking of Rydin PermitExpress™, "Complete Parking Management" comes to mind. If there was one program I could push out to any collegiate institution that is managing parking in any way, if there is one tool you have to have as an administrator in campus safety or running parking this would be the tool to have. Of all the vendors we have with report writing, by far Rydin PermitExpress™ is the most complete system we use. For ease of use and totalitarian, everything ingrained in the system it would be Rydin PermitExpress™. If you have parking management on your plate to handle, you can rest assured if you have Rydin PermitExpress™ it will be handled." – Victor Morrow, Associate Director of Campus Safety, Trine University

Unlimited Users and Custom Access Control

You can create an unlimited number of administrators at your institution and grant the appropriate levels of access. Access and permission levels can be updated in real time. All for no extra charge!

Reports and Lookups

PermitExpress™ gives you the ability to summarize permit and citation data when you need it. Multiple reports can be created in a matter of moments using your data from the real-time dashboard. Use the look up function to export your information and take advantage of all the ways Excel can sort, filter and customize your information.

Dedicated Support Professionals

When you become a PermitExpress™ community member, you gain access to our expert support staff that is there to assist you. Our support professionals are dedicated to helping your operations succeed. No matter how large or small the issue we will work with you to find a solution!

99.8% On-Time Delivery!

DISTRIBUTION SERVICES

[Back to Table of Contents](#)

Rydin has been in business for over 60 years and strives to build relationships with our customers

Many have been printing their permits with us for a long time and the level of trust is high. When following up on orders, we noticed a theme: customers were thrilled with the quality of the permits and the on-time delivery, but still sounded frustrated. We asked why. One of the biggest reasons was permit distribution.

Getting permits in the hands of the drivers can be stressful. Our clients were either having all the drivers come to a school office to pick up, or the staff had to stuff envelopes and put them in campus mail. Either option took time away from the staff's regular duties and caused stress. Someone asked if we could just mail them directly to the drivers.

This is how Rydin Parking Permit Distribution Services were born.

It's a win-win. The drivers are happy because they no longer have to take time out of their busy schedule to pick up their permits. Your staff will be thrilled that the amount of office work has been greatly reduced, or they don't have to spend time stuffing envelopes. Whether you issue 100 permits or 50,000 permits, Rydin has you covered. Our experts will prepare your parking permits and any other inserts, mail them directly to your parkers – and get them to your recipients on time!

How does it work?

Forward Permit & Mailing Data to Rydin

Simply upload a CSV file with students' names, mailing addresses and permit types to our secure FTP site. Our expert Data Processing Team is automatically notified and will begin to prepare your files for processing.

Parking Permit Packets Are Prepared for Mailing

Our team will collate each parking permit into an envelope, along with an introduction letter. You can choose to include other important literature, such as: Rules and Regulations, University Information, or Campus Maps.

Orders are processed and typically in the mail within 48 hours, unless an exact mailing date is specified.

Permits Are Delivered To Students, Faculty, and Staff

The parking permits are sent directly to your students, faculty and staff at the addresses you provided. You will receive an updated database that indicates who received which permit number and when their packet was sent!

What Customers Have to Say About Working With Rydin for Parking Permit Distribution

Colleges, Universities and High Schools across the country are benefiting from the expertise of Rydin Decal and the ease of using Rydin Parking Permit Distribution Services:

"They were in constant communication to make sure that everything was proceeding as we had expected. The Rydin fulfillment center assembled and mailed over 5,000 permits; and students are thrilled that they no longer have to come to our office or some location on campus to pick up their permit."

– Don Andrae | Manager, Parking Services | Auburn University

"Through this new way of distributing our permits, which not only created a great customer service to our students and employees by allowing them to receive the permit within two weeks, but provided benefits of additional value to our services by allowing us time to work on pertinent customer issues instead of time we would usually devote to mailing."

– Mary Mabry | University of Texas Arlington

100% Satisfaction Guarantee

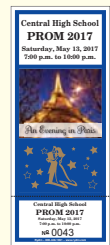

MATERIALS

Rydin has an extensive array of materials, security features and services to perfectly customize your parking permit or other printed product

HANG TAG MATERIALS

Composite materials – Rydin offers a variety of composite material combinations. The standard hang tag product line is made of a 25 mil composite material. It has the look and feel of a credit card. Graphics and text print clean and sharp and the image is protected from scratching and scuffing due to the layers of laminate. To prevent premature fading, UV inhibitors are used in the outside layer. Our composite products are also available in 30 and 35 mil upon request. We also offer a holographic laminate for additional anti-counterfeit protection.

100# White Gloss Cover is a bright white, 10 point paper with a smooth finish. It works well for scratch-off hang tags, keepsake tickets, or stadium credentials. It can be enhanced with foil or hologram stamping.

110# White Index Paper is an uncoated paper. It is typically used for temporary hang tags when a low cost option is needed. It can be easily written on with pen, pencil or rubber stamps.

24 Point Card Stock is a heavy cover weight paper that is used when a more sturdy paper product is needed. It can be used for temporary hang tags that are required to last a little longer.

Polyethylene is a semi-rigid plastic available in thicknesses of 23, 35, and 75 mils. It can be laminated with kaleidoscope or reflective materials for anti-counterfeit features. The 23 and 35 mil thicknesses work well for hang tags. The 75 mil is primarily used for towing signs.

DECAL MATERIALS

Acetate is a clear, semi-destructible material used for inside window application. It has a permanent adhesive and a translucent liner. Acetate is a non-transferable material.

80# White Gloss Cover is a paper that is often used for inside window decals. It has a smooth bright white finish making it an excellent choice for quality image reproduction. It is a great product for an attractive, yet secure, window application decal.

Clear Vinyl with a permanent adhesive is a somewhat flexible, clear material that is typically used for window decals. It comes with an aggressive adhesive.

Clear Vinyl with a removable adhesive is a somewhat flexible, clear material that has a low tack adhesive, making it an excellent choice when the permit needs to be transferable. It is recommended over cling vinyl due to its stability and durability.

Cling Vinyl is a clear material that is used when an aggressive adhesive is not wanted. It's perfect for temporary or short term decals because this material has NO adhesive and although it can be used as a transferable decal, it is not recommended. If a transferable permit is required, a clear vinyl with removable adhesive would be our recommendation.

White Vinyl is the most common outdoor material we use. It is a 4 mil thick material that is somewhat flexible allowing it to fit to surfaces that are not totally flat. It is a good choice for the outside application of permits or bumper stickers.

Cold Weather Vinyl is also a 4 mil thick material. It is used for products that need to be applied in colder weather, as temperature can affect the time it takes adhesive to fully adhere.

Clear Mylar (or polyester) with a permanent adhesive is a very durable material. The permanent adhesive is aggressive and is a non-transferable material.

Clear Mylar (or polyester) with a removable adhesive has a low tack adhesive, making it an excellent choice when the decal needs to be transferable. It is recommended over cling vinyl due to its stability and durability.

White Opaque Mylar is used for window decals that have printing on both sides. It is constructed so the print from one side does not show through the other side. It can have either a permanent or removable adhesive.

SECURITY FEATURES

[Back to Table
of Contents](#)

Counterfeit parking permits are a legitimate concern. It's amazing the amount of work people will go through to avoid paying for a legitimate permit.

Often, the counterfeit permits are obvious fakes and easily detected by parking enforcement personnel (Oh, the stories we've heard!). However, some are realistic enough that it causes enforcement to spend more time than necessary to inspect permits. This can slow down the entire patrolling process, especially at night.

Wouldn't it be great if permits were harder to counterfeit, and easier to identify as valid? Rydin can make that happen in a number of ways.

Security Materials

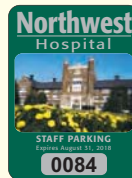

Reflective material can be used as a pressure sensitive decal or laminated to another material to be used on hang tags. Reflecting light from headlights or flashlights provide high visibility of this material at night.

Inside-Window Reflective material provides the same benefit as our other reflective decals but is used on permits that are affixed inside the vehicle's window.

Rydin Reflex is a reflective material that takes anti-counterfeiting a step further by having a watermark integrated into the material's reflective surface. This material can be used for decals or hang tags.

Prismcal is a prismatic material with a "holographic" like feature that changes its look depending on the angle it's viewed. It can be used for decals or hang tags.

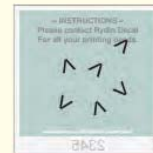

"Void" Mylar is a material that once applied, is very difficult to remove without destroying the permit. It is intended for a single use only. It has special adhesive on the back that if removal of the permit is attempted, the words "VOID" will appear across the permit. This material comes in both silver and white.

Security Features

Metallic foil and Holographic material can be applied to a variety of materials to add a security feature that is very difficult to counterfeit. Foils come in a variety of solid colors, and holographic films have 2D or 3D light refracting patterns. The hologram can also be micro-etched creating a totally unique pattern that is applied to the film.

Counterfeit-Deterrent Ink is a clear ink that is only visible when illuminated by a black light.

Micro-print uses traditional ink, but the text is reduced to a size so small that it appears as a solid line to the unaided eye. Magnification is needed to read this print, and it is too small to be artificially reproduced by most copier machines or digital printers.

Security slits can be used to help a material become more destructible. The slits cause the material to tear when removal is attempted.

Holographic security lamination can be applied to our composite products. The laminate contains a 3D hologram making it extremely difficult to counterfeit.

ADDITIONAL SERVICES

Rydin is committed to offering our customers specialized services at their request. Below are some examples of these services, but should you have a special request, please contact us for additional information. We love helping our customers in any way possible!

Liner Instructions allow you to communicate your application instructions or directional information on the removable liner portion of your decal.

Instructions on the back of a decal can be added to allow you to communicate information such as emergency numbers that will remain in the vehicle for the duration of the permits use.

Sequential Numbering can be applied to most any product. Depending on the choice of materials and the production method, sequential numbering can also have a variety of styles and variations applied. Talk to your sales rep for more information.

Barcoding can be added to most any decal or hang tag to increase security and identify vehicles. Various encoding languages are available.

Polybagging simplifies your distribution process. Decals are inserted into clear plastic bags and delivered in roll form. Permits are pulled from the box in sequential order and easily removed at the perforations.

Glassine Bags are very beneficial when distributing permits. Your product is placed in separate transparent bags that are open on one end. The bags are not on a continuous roll.

Piggyback Labeling is a service where labels are applied to the outside of the polybags. They can include the same sequential number as the contents of the polybag. A corresponding barcode with a human-readable number is available to make scanning the label at the point-of-sale a breeze.

Adhesive Strips can be added by placing a two-sided tape to a finished product. The tape usually has permanent adhesive on one side and removable liner on the other. This tape is used for temporary permits and law enforcement tickets.

Permit books can be produced that are either adhesive bound or stapled. They can be customized based on your needs.

Hole Punching to a finished product for applying suction cups, elastic string loops or pins.

Shrink-wrapping is available for most products. This can provide a layer of protection and a cost-effective way to create convenient-sized packs, allowing for easier handling and distribution of the printed pieces.

Stapling can be used for the gathering and fastening together of separate sheets. Stapling can be as simple as placing a single staple through the corner of a set of documents or can refer to the creation of small durable booklets.

String Loops are made of an elastic string. They can be made in various lengths and are attached to individual pieces. This is a popular feature for event credentials or product tags.

Padding consists of applying a flexible adhesive along one edge of a collated product. The adhesive secures the sheets as a unit, but allows the topmost sheet to be easily removed as needed. In most cases, padded sheets incorporate a chipboard backer for rigidity.

Custom Packaging is a packing service specialized for your needs. If you have a custom packaging request, please work with a Sales Representative. We are happy to accommodate the requests of our customers.

RFID stands for Radio Frequency Identification. It is a radio technology that allows our hang tags to be identified at a distance, by incorporating a small chip & antennae (called an inlay) into the design.

Do you have a special request regarding the production, handling, or shipping of your product? We are happy to help. Please contact our **Sales Team** with any request, and we will do our absolute best to make it a reality!

TERMS AND CONDITIONS

Guarantee

100% Satisfaction is our guarantee to you. All of our workmanship is world class and if applied correctly, we guarantee that our products will last for a minimum of one year!

All of our web orders are reviewed by a highly trained order entry staff dedicated to providing you with the quality and satisfaction expected from an industry leader.

Changes or Cancellations

For a buyer to change or cancel an order after it is placed, the buyer must first obtain Rydin's written consent, which Rydin may decline for any reason. If Rydin agrees, a cancellation fee will be assessed. If for any reason, an order is cancelled or changed after signing a confirmation or submission of a PO, a cancellation fee will be assessed. Cancellation fees

are calculated based upon our current billing rates and which stage the order is in with a minimum of \$150 for a standard order.

Returns

If you are not 100% satisfied with the performance or quality of your product, we will reprint the product for you at no additional charge. All claims for returns must be made within 30 days of shipment. No returns accepted without authorization from Rydin. We reserve the right to accept or reject any order.

Rydin is not liable for errors in formatting, size, color, spelling or product layout if said error is present on product proofs issued to the buyer, unless the buyer informs Rydin of said errors in writing upon receipt of the proof.

Pricing subject to change.
