

## Case Study: Moffitt Cancer Center

### Using Rydin PermitExpress™ to simplify parking in a more resourceful way

#### The Problem:

Moffitt Cancer Center was frustrated with their parking permit registration process. Close to 3,000 drivers would fill out a registration form by hand, and then all of that information had to be entered into a spreadsheet. That process took 2 months, and parking enforcement was a headache during that time. There had to be a better way.

#### The Solution:

Moffitt Cancer Center contacted us about our RPE system and received exactly what they desired. They now had software that was easy to manage and would limit the amount of paper work and data entry.

#### The Value:

- The RPE system saved the cancer center countless hours for the registration of employee, physician, and nurse parking permits.
- They can easily navigate through all the information with no issues.
- They are able to now handle their violation information electronically, which is what they desired.

#### Testimonial:

**“Rydin Permit Express is so easy to use! It’s nice to be able to have all the information we need at our fingertips. On top of all that, the customer service is great! Kudos to Mike, he really takes care of us.”**

-Errol Tilman, Manager of Parking Services

Rydin helped Moffitt Cancer Center streamline their registration process. The center thinks the “easy to use” process is beneficial to their parking management program.
