

HOW TO USE OUR PRODUCTS

Car Rider Pickup Visor Sign

Write the child's information on the Car Rider Pickup Sign in permanent marker. Remember to allow the ink to dry to avoid smearing the ink.

- 1) Slide the elastic band through the slit into the circle tab on the top of the student tag. Make sure the elastic band stays inside the circle tab.
- 2) Wrap the elastic band around the passenger side visor with the student's information facing the windshield.
- 3) Flip your visor down when picking up your student up so the tag is facing out. After you have picked your child up, flip the visor up to store the tag.

Car Rider Matching Backpack Tag

Attach the tag to the child's backpack with the security loop. Write the corresponding information from the parent's visor sign. Again, permanent marker is recommended. This will allow school faculty to easily see the necessary information on the tag.

School Bus Tag, Walker Tag, and Before/After School Tag

Attach to the student's backpack with the security loop. Write the bus number and the location of their stop to the School Bus Tag. Write the name of the before/after school program with a permanent marker. This allows for the faculty to easily see where each student should be at the end of the day.
