RESIDENTIAL & VEHICLE PERMITS

Custom shapes are our specialty!

Add shape to your security access control products with Rydin! We offer over 1,000 different custom die cuts that provide design flexibility where your typical standard shapes fall short. If we don't have what you're looking for, we can always create a customized die that's tailored to your specific needs.

Metallic Blast: Metallic Blast is a hot new process that creates a metallic decorative appearance on your product. Metallic Blast is not just beautiful, it instantly increases security and deters users from attempting to counterfeit.

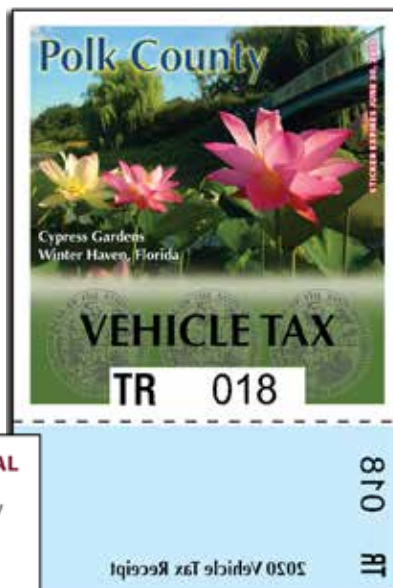

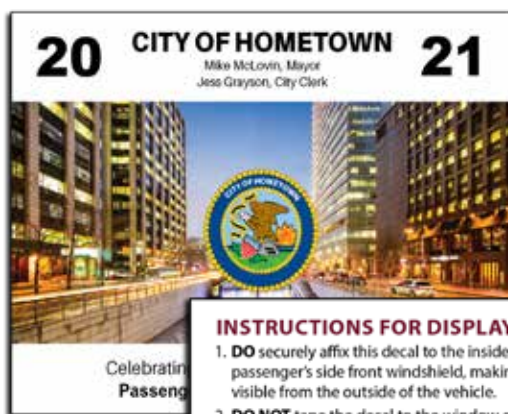

Need help with enforcing the rules? We have your back!

Not only is the information on the front of your permit important, the message on the back is crucial as well. There are many reasons why choosing to place text or an image on the back of your permits may be a great option for you!

RESIDENTIAL & VEHICLE PERMITS

INSTRUCTIONS FOR DISPLAYING THIS DECAL

1. **DO** securely affix this decal to the inside of the vehicle on the passenger's side front windshield, making sure it is completely visible from the outside of the vehicle.
2. **DO NOT** tape the decal to the window or laminate it.
3. **DO NOT** cover any part of the decal, especially the barcode and number.
4. **DO** remove any expired permits prior to affixing this one.
5. Failure to abide by these instructions will result in a parking violation.
6. Questions should be directed to Public Safety at 410-692-4860.

Place decal here.

www.kutztown/parking

Liner Instructions: Allows you to communicate your application instructions or directional information on the front and back of your permits.

General Instructions: Allows you to communicate information such as rules and regulations or emergency numbers that will remain in the vehicle for the duration of the permit's use.

Facility Map: Allows you to provide a map and directions to your facility.

Advertisements: Allows you to promote your brand and upcoming special events.

Sponsorships: Allows you to keep your permit costs at a minimum, and also gives a local business prominent advertising within the community.

WHY CHOOSE RYDIN?

ONE YEAR WARRANTY
WE STAND BEHIND OUR PRODUCTS.

ON-TIME DELIVERY
YOUR ORDER WILL BE SHIPPED ON-TIME, EVERY TIME.

100% SATISFACTION GUARANTEE
IF YOUR NOT SATISFIED, WE'RE NOT SATISFIED.

CUSTOMER FOCUSED
WE MAKE OUR CLIENTS THE PRIORITY AND PUT THEIR NEEDS IN FRONT OF OURS.

LICENSE DECALS

We have all the finishing touches you need!

When we're finished printing your product, the fun has just begun! Our staff will make sure to put all of the finishing touches on your pieces. Some of our most popular professional finishing services include:

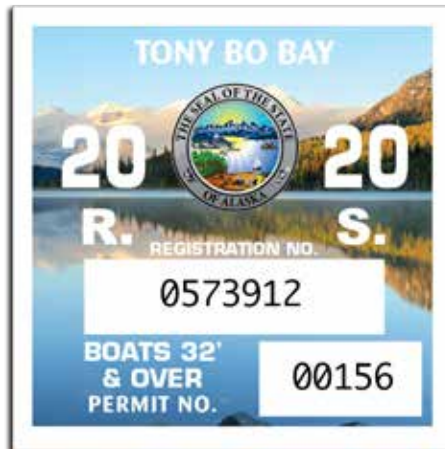

Sequential Numbering: Can be applied to most any of our products. Depending on the choice of materials and the production method, sequential numbering can also have a variety of styles and variations applied.

Adhesive Strips: Can be added by placing a two-sided tape to a finished product. The tape usually has a permanent adhesive on one side and a removable liner on the other. This tape is used for temporary permits, law enforcement tickets and placards that adhere to the front window.

Glue Dots: Can be added when you're looking to temporarily adhere a product to another surface. Glue Dots are great for temporary permits and custom products.

Polybagging: simplifies your distribution process. Decals or Hang Tags are inserted into clear plastic bags and delivered in roll form. Permits are pulled from the box in sequential order and are easily removed at perforations. This is great way to organize and store your permits.

Piggyback Labeling: Is a service where labels are applied to the outside of the polybags. They can include the same sequential number as the contents of the polybag. A corresponding barcode with a human readable number is available to make scanning the label at the point-of-sale a breeze.

String Loops: Are made of an elastic string. They can be made in various lengths and are attached to individual pieces. This is a popular feature for event credentials or product tags.

Shrink-wrapping: Is available for most products. This can provide a layer of protection and a cost-effective way to create convenient-sized packs, allowing for easier handling and distribution of the printed pieces. Your permits will also come in sequential numbering.

Book Binding: Permit books can be produced that are either adhesive bound or stapled. They can be customized based on your needs. This is a popular feature for Season Tickets and Non Carbon Receipt books.

Abrasive Ink: Allows you to write with multiple pen inks on your permit. The large white space allows you to more easily identify your permit from afar and gather the data needed for identification.

Glassine Bags: Are very beneficial when distributing your permits. Your product is placed in separate transparent bags that are open on one end. The bags are not on a continuous roll. This option is great way to keep your permits dust free!

Standard Decal Materials:

Clear Mylar (Polyester): is a very durable material that does not tear easily making it ideal for inside or outside applications.

White Vinyl: is the most common outdoor material we use. It is a 4mil thick material that is somewhat flexible allowing it to fit to surfaces that are not totally flat. It is a good choice for the outside application of permits or bumper stickers.

For added functionality and security

Semi-Destructible: When removed, these materials will tear, and will reduce the illegal transfer of decals between vehicles.

Acetate: is a clear, semi-destructible material used for inside window application. It has a permanent adhesive and a translucent liner.

Hard White Vinyl: is designed to be applied to the outside of the vehicle.

Destructible: 80# White Gloss Cover is designed to be applied to the inside of the vehicle.

What is RFID?

RFID stands for Radio Frequency Identification. It uses radio waves to communicate information that uniquely identifies an individual object. That information is encoded to a chip that is connected to an antenna, and these two components together are called an inlay.

The inlay is affixed to your parking permit and encoded with the unique permit number. Rydin has been successfully producing RFID enabled permits for years.

MOTORCYCLE DECALS & ALUMINUM TAGS

Motorcycle Permit Tags

Motorcycle Permit Tags are a great alternative to traditional decals. They're printed on a sturdy plastic and easy to attach with a zip tie.

Permit tags eliminate the hassle of removing sticky adhesive from the commuter's motorcycle.

We'll secure your city with our selection of armour.

Wouldn't it be great if permits were harder to counterfeit, and easier to identify as valid? Rydin can make that happen in a number of ways.

Foil Stamping and Metallic Blast™: Foil Stamping adds elegance and security to your parking permits. Foil stamping uses traditional methods and there are a limited number of colors available.

Metallic Blast™ is our latest method of adding foil to your permits. Almost any color foil can be created using Metallic Blast™.

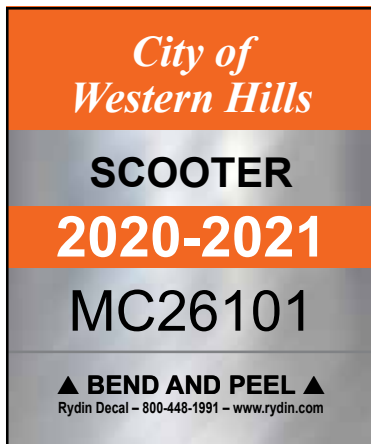

Foil stamping and Metallic Blast™ can be used in almost any part of your permit — logo, graphics, text, number box, sequence number (Metallic Blast™ only), etc.

Barcodes: Barcodes make it faster to verify parking permits and eliminate keystroke error in the field.

We use the specific barcode symbology (language) that works with your scanning system. Two of the more common barcode languages are 3 of 9 and 128.

Security Slits: Security Slits are small die-cuts in the decal. When removed from the windshield, the slits help the decal to rip, shred, and tear. Two of the most popular patterns are Chevron or VOID.

MOTORCYCLE DECALS & ALUMINUM TAGS

*Flat "S" Hook and "O" Rings available for purchase. Please ask your Sales Representative for more details.

Reflective Material: Can be used as a pressure sensitive decal or laminated to another material to be used on hang tags. Reflecting light from headlights or flashlights provide high visibility at night. For extra security, Rydin Reflex also includes an *exclusive watermark*.

Destructible: 80# White Gloss Cover is designed to be applied to the inside of the vehicle.

Semi-Destructible: When removed, these materials will tear, and will reduce the illegal transfer of decals between vehicles

Void: "Void" Mylar (Polyester) is a material that once applied, is very difficult to remove without destroying the permit. It is intended for a single use only. It has special adhesive on the back that if removal of the permit is attempted, the words "VOID" will appear across the permit. This material comes in both silver and white.

Scratch-Off Hang Tags

Are you looking for an additional security feature in your temporary parking permits? Our Scratch-Off Hang Tags allow you to assign an expiration date at the time the permit is issued. If more than one date is exposed, the permit becomes invalid. Custom sizes are available and back print or instructions are optional features. These hang tags can also be used with a punch without the scratch-off ink.

As with all our products, we can customize your scratch-off permits to suit the needs of your organization.

"Punch Style" Permit

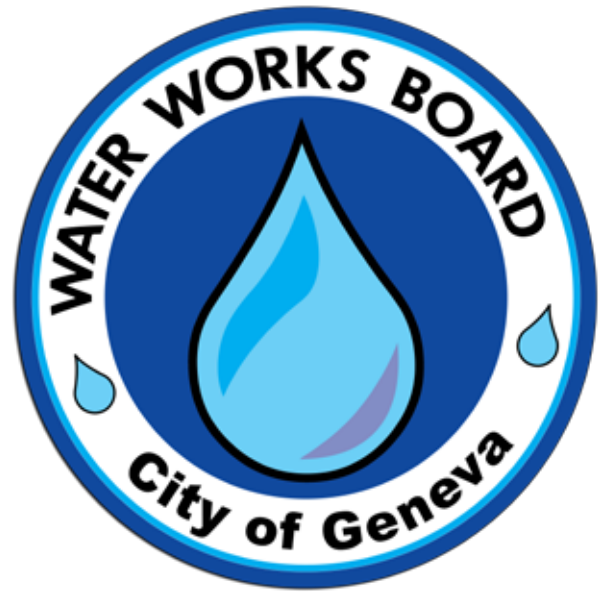

- Large, easy to read numbers
- Write-in areas for parking staff to use
- Add your organization's logo
- 4-color picture of your organization

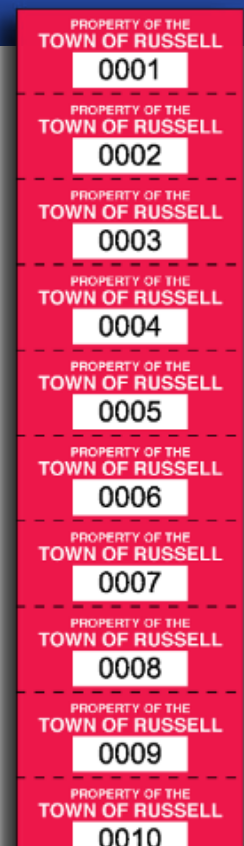

VEHICLE DOOR DECALS

PROPERTY I.D. & PHONE DECALS

IF YOU'RE LOOKING FOR A QUICK FIX, RYDIN'S STOCK PRODUCTS ARE THE PERFECT SOLUTION!

Each pack is consecutively numbered!

Ready to ship the next day!

Affordable alternative for you to identify who belongs in your parking facility.

All stock products are printed on quality durable materials!

Materials

Available Material Options

Hang Tags

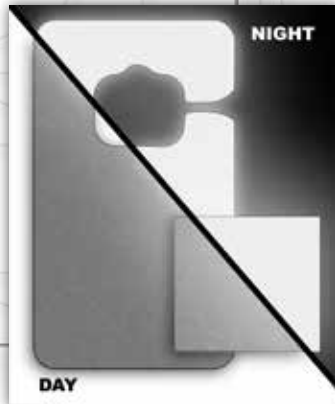

- **Composite:** Available in 20-Mil (Standard), 30-Mil, and 35-Mil. Made from layers of laminate over a synthetic or paper core, look and feel of a credit card, Ultraviolet (UV) coated.
- **Synthetic:** 14-Mil, very durable for temporary permits, can be written on with pen or marker. They work well for guest and vendor parking permits.
- **100# White Gloss Cover:** 10 point paper, temporary, smooth finish. Ideal for scratch off and temporary permits.
- **Astrobright® Cover:** 10 point paper with a matte finish. Available in a variety of colors. Recyclable. Ideal for temporary hang tags.

Special Materials: For added functionality & Security

Reflective

These semi-destructible materials are pressure sensitive and reflect light from headlights or flashlights.

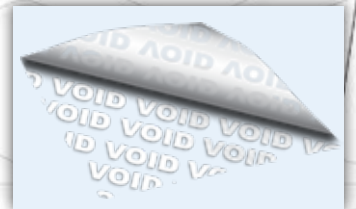

- **Reflective:** Looks gray and sparkly during the day, but turns white when reflecting light at night.
- **“Official Use Only” Watermark:** A reflective material with an “Official Use Only” seal watermark.

Semi-Destructible

It is difficult to remove these materials without tearing them. This reduces the attempts to illegally transfer decals from one vehicle to another.

- **Acetate:** 2-Mil, clear. Comes with white liner. Inside window style only.
- **Void Polyester:** 2-Mil, white or silver, separates into two layers when removed, Leaves “Void” on permit and the surface it is removed from. Available in silver and white, bumper style only.

Removable

These materials can be removed easily without ruining the decal. These are intended for inside-window application use only.

- **Removable Polyester:** 2-Mil, clear, low tack adhesive, good for transferable decals.
- **Removable Vinyl:** 4-Mil, clear or white, low tack adhesive, flexible, good for transferable decals.
- **Cling Vinyl:** 8-Mil, clear, no adhesive, good for temporary or short-term decals. Not recommended for transfer.

Destructible

These materials cannot be removed without tearing, making it impossible to transfer them.

- **80# White Gloss Cover:** 8 point paper, white. Tears easily. Inside window style only. Available with Metallic Blast!

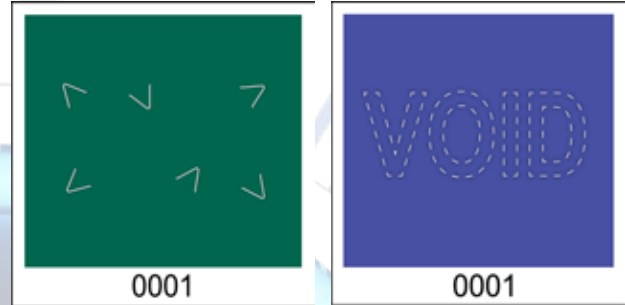

****Some security options may not be available with all materials or products. Check with a Rydin Representative to see what options may best suit your needs.**

Security Features

2025-2026

0001

Security Slits

Security Slits are small die-cuts in the decal. When removed from the windshield, the slits help the decal to rip, shred, and tear. Two of the most popular patterns are Chevron or VOID.

Foil & Metallics

Use these in almost any part of your permit design: Logos, graphics, text, number boxes, and sequential numbering.

- **Foil Stamping:** Holographic and Metallic foils. Using the traditional methods to add elegance and security. Limited colors and patterns available.
- **Metallic BlastSM:** Holographic and Metallic foils. This is our updated method of adding foils to our products. Almost any color is available.
- **Secure & Valid Gold** and **Secure & Valid Silver** are both foiled stamping options that are exclusive to Rydin and add an additional level of security to any design.

Black Light Security Ink

An extra level of counterfeit protection - under normal light this ink is virtually invisible. Your message is revealed when exposed to a UV Black Light.

Laminations

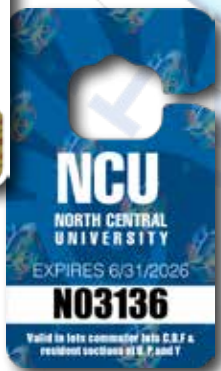

These are an extra layer of counterfeit protection.

- **PrismCal[®] Pattern:** This light diffracting, kaleidoscopic addition is eye-catching and impossible to counterfeit. It can be added to both hang tags and decals.

Scratch-Off Ink

Our Scratch-Off Hang Tags allow you to assign an expiration date at the time the permit is issued. If more than one date is exposed, the permit becomes invalid. Custom sizes are available and back print or instructions are optional features. These hang tags can also be used with a punch without the scratch-off ink.

As with all our products, we can customize your scratch-off permits to suit the needs of your organization.

Microprint

Using our microprint technology we can print text in a 1 point font. This is so small that if someone attempts to photocopy your permits the text will be distorted and blurred.
