ID Badge Buddys

Built to Last in Demanding Environments

Engineered for Everyday Toughness

Your team depends on identification tools that hold up to real-world conditions. Rydin's **ID Badge Buddys** are built with durability at their core, ensuring they stay strong, clean, and legible no matter how often they're used.

Made From 20-Mil Composite Material

Every **ID Badge Buddy** is constructed from a lightweight, yet durable 20-Mil composite material with a synthetic core. This lightweight yet resilient material won't bend, bubble or tear during daily wear.

Laminated for Maximum Protection

Our laminated synthetic core design ensures that edges stay intact and smooth. This prevents fraying, curling, and the typical breakdown that can happen with a paper core, such as many manufacturers use. The result: an **ID Badge Buddy** that looks new far longer.

Perfect for Sterile Environments

In workplaces where cleanliness is essential—hospitals, clinics, labs, schools—**ID Badge Buddys** stand up to repeated disinfection without weakening. The material won't absorb moisture or cleaning chemicals, and colors stay vibrant through daily wipe-downs. *No smearing!*

Reliable Durability Shift After Shift

Whether clipped to scrubs, badges, lanyards, or retractable reels, these **ID Badge Buddys** resist the wear of constant handling. They won't snag on uniforms, split at the edges, or fray from repeated use.

Built to Serve as Long as You Do

From hectic morning rushes to late-night rounds, your identification should remain strong and readable. Rydin's durable construction ensures every **ID Badge Buddy** is ready for long-term use! Plus, with our 1-year guarantee you can count on consistent and dependable performance.
