Why Parking Programs Are a Shared Responsibility

On today's campuses, parking impacts more than convenience. It directly affects:

- Campus safety and patrol efficiency
- Traffic flow and emergency access
- Citation credibility and appeals volume
- Student, staff, and visitor experience
- Administrative workload and staffing costs

Parking & Transportation Directors and Campus Police face the same fundamental challenge from different sides:

Clearly identifying who is authorized to be where — quickly, consistently, and defensibly.

Rydin's role: We provide **physical permit and messaging solutions** that reduce ambiguity, support enforcement decisions, and simplify program management — without forcing you to replace systems that already work.

Built for Real Life Campus Parking Challenges

College parking programs operate under constant pressure: limited space, tight timelines, permit distribution surges, enforcement scrutiny, and high expectations from drivers. When permits are late, unclear, or inconsistent, the impact is immediate — long lines, frustrated students and staff, and enforcement disputes.

1. Enforcement Needs Instant Clarity

Officers can't spend time interpreting unclear permits or debating validity in the field.

What helps: High visibility permits with predictable placement and fast authenticity cues.

2. Visitor & Temporary Parking Creates Exceptions

Events, vendors, short term access, and guest vehicles strain staff and enforcement.

What helps: Temporary permits with controlled validity windows and clear visual differences.

3. Permit Sharing & Counterfeiting Undermine Compliance

Unauthorized transfers and counterfeit reproduced permits erode credibility and revenue.

What helps: Security features that are hard to duplicate and easy to validate at a glance.

4. Distribution Consumes Staff Time

Pickup lines and manual fulfillment pull staff away from higher value work.

What helps: A hands off distribution model that gets permits directly to end users — accurately and on time.

Why Campuses Partner With Rydin

- Supports student, faculty, staff, resident, commuter, visitor, and event programs
- Visual, barcode, and LPR compatible options
- Security matched to your risk level – not overkill
- Permit Distribution Services to reduce in office traffic
- Dedicated campus permit specialists and U.S. based support and production

One Program. Many Permit Types. One Consistent System

No two campuses park the same way – but most manage the same mix of drivers, enforcement methods, and administrative constraints.

A Permit Program Built Around How Campuses Actually Operate

Rydin helps you build a layered permit program – mixing visibility, security, and flexibility so your program works as a single system (not disconnected parts).

Who Parks on Your Campus?

Students • Faculty & Staff • Residents
Commuters • Visitors • Events & Game Days

How Do You Enforce?

Visual validation • Barcode/QR scanning
LPR • Hybrid programs

How Do You Distribute?

In office pickup • Mail distribution
Temporary permits while shipping
Hybrid workflows

***Permit Consideration:** The more consistent the permit system, the fewer disputes, appeals, and escalations downstream.

RXL Hang Tags

Visibility Built for Modern Vehicles

Designed for Enforcement. Built for Today's Windshields

Newer vehicles often have cameras, sensors, and electronics near the rearview mirror – often making hang tags with smaller hooks difficult to hang or display. Rydin's RXL (Extra Large Hook) Hang Tags solve this by allowing easier placement, while still being highly visible enabling quick verification.

Why Campuses Choose RXL Hang Tags

- Extra large hook fits around modern mirror assemblies
- Highly visible at a distance for patrol staff
- Durable composites built for year round use
- Transferable when policy allows

3.6x Bigger Hook, Perfect for New Model Mirrors!

Operational Impact

- Faster field verification
- Fewer improper display citations
- Reduced confrontation during enforcement

Designed to be seen.
Built to be recognized.

Custom Hang Tags

High Visibility, Easy Validation

Hang tags remain a core component of campus programs because they're fast to validate, flexible for policy, and easy to manage at scale.

Key Features

- Standard shapes or fully custom die cuts
- Large, easy to read numbering
- Color coding by zone, classification, or year
- Optional barcodes/QR for faster verification
- Optional security upgrades (foil, holographic laminate, microprint, or reflective laminate.)
- Back printing for rules, maps, contacts, or instructions
- Four-color printing and variable number customization included

Best For

Commuter students • Shared vehicles • Staff parking
Zone based programs

Parking Decals

Non-Transferable Control & Built-In Security

Decals provide more permanent authorization when preventing transfer, resale, or sharing is a priority. Also available - Removable decal options that allow repositioning or infrequent transfer, if allowed.

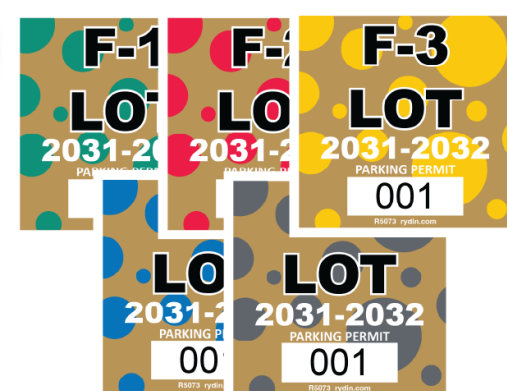

Decal Options That Matter on Campus

- Available in standard shapes or fully custom die cuts
- Inside window (face adhesive) or exterior placement (also known as bumper decals)
- Semi destructible and VOID materials to deter transfer
- Security slits and tamper resistant construction
- Sequential numbering and variable data options
- Reflective materials aid night enforcement
- Liner instructions or permanent messaging (rules, placement, contacts)

Inside Window Decal

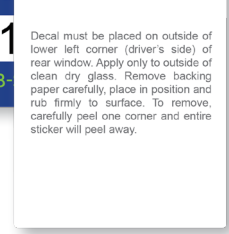

Bumper/Exterior Decal

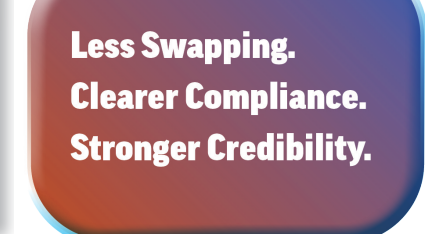

Cover Multiple Lots with Differing Colors, Patterns, and Sequential Numbers

Add Liner Instructions or Backprint

Decal must be placed on outside of lower left corner (driver's side) of rear window. Apply only to outside of clean dry glass. Remove backing paper carefully, place in position and rub firmly to surface. To remove, carefully peel one corner and entire sticker will peel away.

Prismatic Feature Added For Security

*Decals not all depicted to actual scale, see guide for sizing

Temporary, Visitor, & Event Permits

Permits That Keep Traffic Moving

Permit season, move in, campus visits, and special events create short term demand. The goal is controlled access without creating manual exceptions.

Temporary Permits That Don't Create Permanent Problems

Common Formats

- Temporary paper or synthetic hang tags
- Available in **multiple colors**, perforated, and fully custom
- Scratch off validity permits (issue on the spot)
- Punch style and self laminating permits
- Bound permit books to keep issuance organized and sequential
- Event specific permits (high visual differentiation)

What Enforcement Needs

Clear start/end validity + obvious visual difference from annual permits.

Add Perforations

Write-on area allows authorization at issuance.

Book Binding

Temporary Monthly Permit books can be either bound with glue or stapled into books.

Self-Laminating

Assign expiration dates and other crucial information as you issue permits.

Scratch-Off

Scratch-off permits offer fast, visible expiration control for enforcement. Dates are set at issuance, and tampering invalidates the permit—ideal for short-term and high-turnover parking needs.

Adhesive Strips

Adhesive strips add functionality and reliable placement for temporary permits keeping them securely in place.

Punch-Out

Enforcement Tools, Security, & Compliance

Built for Enforcement, Not Just Issuance

A permit program is only as effective as its enforcement. Rydin products are designed to help officers make quick, defensible decisions in the field – day or night.

Enforcement Focused Design

- High visibility layouts readable at a distance
- Reflective materials for night enforcement
- Barcode/QR options for faster checks
- Clear placement instructions to reduce disputes

Backprint, Barcodes, & QR codes

Add important info like how to pay on the back!

Behind the Life Sciences Building, Segal Hall Lot (across from the Levin Dining Hall), behind the Library, along the train tracks across from the Greenhouse on Campus Loop Road, behind South Hall / Dining Hall, the Hort Building, behind Berkowitz Hall, individually designated spaces, and any other area not mentioned specifically in the authorized student parking areas list are OFF LIMITS for students to park in AT ANY TIME.

Payment for parking violations are only accepted online at the following address: <https://delval.edu/public-safety/parking>

SCAN ME

Tickets are payable within 30 days of the issuance date. If a ticket is unpaid within 30 days it will be sent to the bursars office for a hold to be placed on your account. If you accrue multiple unpaid tickets (3) or are found parked in certain targeted enforcement areas, your vehicle may be subject to being immobilized. If your vehicle is immobilized you will have outstanding violation balances in addition to having the immobilizer removed.

Any additional information regarding regulations including appeals may be found at: <https://delval.edu/public-safety/parking>

Permit Distribution Services

Take the Lines Out of Permit Season

Distributing permits is often the most time consuming part of a campus parking program. Rydin's Permit Distribution Services reduce in office traffic, seasonal staffing strain, and mailing errors.

Permit Distribution Without the Lines

How It Works

1. Upload your permit file securely
2. Rydin prints, packs, and prepares mailings (with your inserts)
3. Permits are delivered directly to end users with tracking + reporting

Customize Your Distribution Options

- Welcome letters, rules, maps, FAQs can be included in each packet
- Temporary permits included while permanent permits ship
- Fulfillment reports showing your shipments, dates, and recipients

Operational note: Most orders are processed and mailed within 48 hours unless a specific mail date is requested.

[Learn More!](#)

**Fewer Lines.
Fewer Exceptions.
More Time for Other Priorities.**

“Through this new way of distributing our permits, which not only created a great customer service to our students and employees by allowing them to receive the permit within two weeks, but provided benefits of additional value to our services by allowing us time to work on pertinent customer issues instead of time we would usually devote to mailing.”

Health, Safety, & Emergency Messaging

Critical Information Where Students Can See It

Safety and critical messaging can't rely on one channel. These solutions place essential information directly into the spaces students and staff use daily – especially residence halls and high traffic buildings.

Crisis Decals

Campus specific emergency instructions and contact information placed in visible locations.

Toilet & Mirror Stickers

Discreet, repeat visibility for safety and wellness messaging in dorms and student facilities.

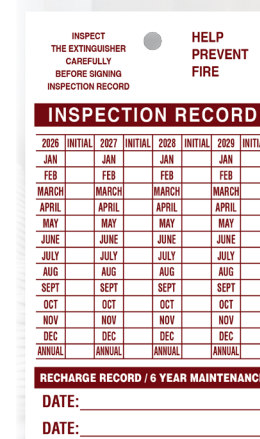

Facility Messaging Decals

Consistent alert/warning messages - whether critical or informational is important. Including: Video surveillance, No Smoking, Parking Restrictions

Fire Extinguisher Tags

Add emergency contacts, reminders, or inspection/maintenance tracking to required safety fixtures.

ID Based Safety & Validation

Information That Travels with the Person

ID Badge Buddies

Put response steps, key contacts, or role identification directly behind an ID – easy to update without reprinting IDs.

- Quick role identification
- Emergency or custom messaging can be printed on back
- Long term use – will not fray
- Made of highly durable material

Credentials & Event Passes

Durable identification for employees, visitors, vendors, and events – with variable data and scannable codes.

Add Barcodes, QR codes, or variable data.

Residence Life Communication

Clear Messaging in Student Living Spaces

Residence halls require durable, visible tools that are easy to deploy and easy to update.

Door Hangers

Direct to resident communication without adhesive – ideal for time sensitive notices and building specific messaging.

Dorm Safety Decals

Smaller targeted decals for entrances, lounges, kitchens, laundry rooms, elevators – consistent messaging even as residents change year to year.

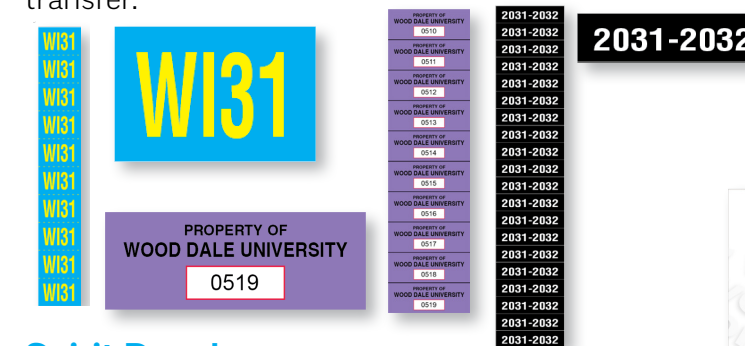

Validators, Asset ID, & Campus Culture

Identify People. Protect Property. Build Belonging.

Validator Stickers (Student ID Labels)

Add expiration/term validation quickly using semi-destructible materials that discourage transfer.

Asset Identification (Property ID Labels)

Track assets clearly with numbering, barcodes/QR, and tamper evident options to support inventory and deter theft.

Spirit Decals

High quality decals for alumni, student organizations, Greek life, athletics, and admissions – durable materials, custom shapes, long lasting pride.

Motorcycles, Bikes, & E-Mobility Identification

Clear Identification for Every Way Your Campus Moves

Parking programs increasingly extend beyond cars. Motorcycles, bikes, e-bikes, scooters, and shared mobility introduce new challenges for authorization, visibility, and enforcement.

Motorcycle Permit Tags

Decals, aluminum, or rigid plastic options; built for durability, clear identification, and consistent enforcement across campus parking areas.

Aluminum Tags Available in Multiple Colors

Bicycle & E-Bike Decals

Weather resistant materials; semi-destructible options to discourage removal; supports registration, theft deterrence, and enforcement visibility.

Scooters & Shared Mobility

Customized decals/tags to differentiate approved vs. unapproved devices.

We can make custom mass transit tags.

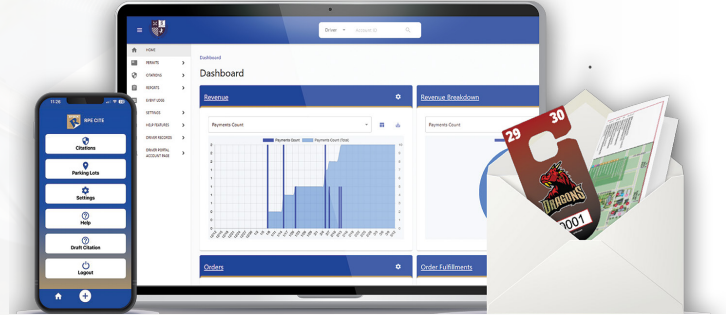

RYDIN PermitExpress®

Parking Permit Management System

Discover the efficiency of RYDIN PermitExpress® - a web-based parking management solution.

Rydin PermitExpress® is a full software suite that allows you to simplify your entire permitting process. From a registration only model through to a complete print and distribution system, you can build the solution that meets your unique permit management needs.

Rydin PermitExpress® streamlines the entire process and creates a simplified parking management experience.

The Rydin PermitExpress® System

- Online Permit Registration and Payment
- Integrate Rydin's High Quality Parking Permits
- Direct to User Distribution
- Data/Citation Management

RYDIN PermitExpress® - Better, Simpler, Streamlined

Rydin PermitExpress combines:

- Simplified Online Registration Portal
- Distribution & Online Driver Payments
- The RPE Mobile App – Managing Parking Compliance

A Successful Program –Saving Time and Money

Rydin PermitExpress® is a complete all-in-one permit distribution and parking management system. Add in Rydin's high quality permits to complete your parking program.

Request a **RYDIN Demo!**

“Less man hours are devoted to updating our database, writing citations and issuing permits, so more time can be devoted to Students and Faculty/Staff.”

- College Director of Public Safety

“We wanted to have a vehicle registration system where we could have input, ownership of equipment, and ease of use. All that was accomplished with Rydin PermitExpress®”

- University Access Manager
